Counterfeit Part Mitigation Plan	Prepared by	Jesse Stevens
	Version	1

1. Counterfeit Parts Mitigation Plan

To prevent the use and mitigate the risk of counterfeit parts, Integrated Test Solutions procures parts and materials from OEMs/OCMs and authorized/franchised distributors.

In the event that electronic parts need to be procured from a non-authorized, non-franchised, or independent distributor; Integrated Test Solutions will notify and seek approval from the customer prior to use. The notification will include the Part Identification and proposed Source of Acquisition.
